

## Ground Mount Installation Waiver

Our professional staff will attempt to place your flag pole where you decide to put it. It is the property owner's sole responsibility to select a spot that is free of any encumbrances. (I.e. Buried Utilities including but not limited to, telephone, water, electric, gas) As the ground mount goes into the ground 3 feet it is of the utmost importance that there are no utilities where you desire to have your flag pole erected. It is our recommendation that unless you are positive there are no utilities in your selected area that you should call diggers hotline before you direct our installer to proceed.

It is also important that you recognize that not all locations are suitable for your Flag Pole Ground Mount (i.e. too rocky or too loamy soil.) Feel free to discuss with our professional installers your preferred and alternate locations.
